Subject: Letter of Endorsement: Brain Health Summit

I am happy to announce that the Spanish Society of Neurology, as a member of EAN, is proud to endorse the upcoming Brain Health Summit hosted by the European Academy of Neurology and are happy to contribute to its successful implementation.

The Brain Health Summit, titled **Brain Disorders: The Unseen Force in Non-Communicable Diseases** will take place on **16 November 2023, in Brussels**. The event is organized by the EAN and held under the umbrella of the Brain Health Mission - an initiative dedicated to fostering global support for individuals to prioritize their brain health. Embracing a unifying slogan: One Brain. One Life. One Mission, its main goal is to ensure a basic understanding of how to make optimal brain health accessible to the public through all stages of their lives, improve systems for those who live under unfair circumstances, and push for equal education opportunities for doctors.

This is a great honour for the neurological community and an important event to highlight the large burden of neurological disorders and the need to act.

With the goal to raise awareness for brain health on all levels and to contribute to the equal availability of care for those suffering from neurological diseases, the Brain Health Summit will provide an opportunity for international dialogue and collaboration between the key stakeholders.

On behalf of the Spanish Society of Neurology,

Dr. José Miguel Láinez Andrés
President
