

DRUG-RESISTANT EPILEPSY: WHERE ARE WE TODAY?

As part of the virtual EAN 2020 Congress, Arvelle Therapeutics is delighted to invite you to the satellite symposium '**Drug-resistant epilepsy: where are we today?**'

Sunday 24 May 2020, 18:30–20:00

Room: Amsterdam

Professor Emilio Perucca (Pavia, Italy) will be joined by colleagues Professor Eugen Trinka (Salzburg, Austria), Professor Manuel Toledo (Barcelona, Spain), and Professor Sylvain Rheims (Lyon, France) to provide a state-of-the-art overview of the current landscape in drug-resistant epilepsy (DRE).

Please join us at this exciting satellite symposium where the expert faculty will discuss, guided by a series of clinical cases, the current outcomes for people with DRE, the challenges faced in managing polytherapy in people with DRE, and diving deep into the causes of mortality.

We hope you will join us to gain new insights, and share your own perspectives during our live discussion with the panel.

Agenda

Welcome from the Chair	Emilio Perucca
Seizure freedom in people with DRE: science or fiction?	Eugen Trinka
Optimizing polytherapy to achieve efficacy and safety balance	Manuel Toledo
Mortality in people with DRE	Sylvain Rheims
Panel discussion and summary	All

We look forward to welcoming you.
