Satellite Sessions Program

Management of Relapsing-Remitting Multiple Sclerosis with an S1P Receptor Modulator
Saturday, 19 June 2021
09:30-10:00 CEST | Room: Helsinki
Chair: Jiwon Oh, MD, FRCP | University of Toronto
A presentation on the management of RRMS with an S1P receptor modulator, ozanimod, that will review efficacy and safety data from pivotal phase 3 trials, dosing, and initiation.

The Effect of an S1P Receptor Modulator on Cognitive Processing in Patients with Relapsing-Remitting Multiple Sclerosis
Sunday, 20 June 2021
09:30-10:00 CEST | Room: Istanbul
Chair: John DeLuca, PhD | Rutgers New Jersey Medical School
A discussion on cognitive dysfunction in RRMS, the efficacy and safety data from pivotal phase 3 ozanimod trials, and the effects of ozanimod on brain atrophy and SDMT.

Quantitative Brain Analysis: Past, Present, and Future
Monday, 21 June 2021
09:30-10:00 CEST | Room: Helsinki
Chair: Michael G. Dwyer, PhD | University at Buffalo
An overview of brain atrophy in multiple sclerosis that will discuss the challenges and technological advances in measuring brain atrophy in clinical practice.
