Horizon Therapeutics

Company Info ▼

At Horizon, we believe science and compassion must work together to transform lives. A company focused on researching, developing and commercializing medicines that address critical needs for people impacted by rare and rheumatic diseases, we apply scientific expertise and courage to bring clinically meaningful therapies to patients.

That's why we think differently about research and development, so we can deliver in new ways for the patients and families we serve.

We believe our responsibility also extends to the communities where we live and work, which is why we are committed to helping transform and better the lives of those who need it most.

To make a bigger difference, we nurture a work environment that reflects the diversity of our patients. We build teams who work together with speed and urgency, because each extra day it takes to get something done is an extra day that someone may not have the medicine or support they need. Because at Horizon, success is measured by the number of lives we touch, the number of lives we change and those we work tirelessly to help save.
