All electrical products and appliances supplied have been tested and maintained in accordance with the ÖVE/ÖNORM E 8701 standard. The test report can be seen at any time on request. An **inspection sticker** is affixed to each appliance, stating the date of the next test.

Flexible low-voltage cables conform to the ÖVE/ÖNORM E 8001 standard, and measurements were taken at the lowest insulation value (L1, L2, L3 against protective earth conductor) of \_\_\_\_\_  $\Omega$ .

Our distribution boards are constructed and wired in accordance with the applicable technical regulations for electrical engineering. They exhibit no defects, are serviced annually, and subject to regular testing. An inspection sticker is affixed to each distribution board, stating the date of the next test.

\*Fault protection measures and additional protection are tested on-site and in situ prior to use.

The following values were recorded:

**Z<sub>s</sub> (L1)** \_\_\_\_\_  $\Omega$     **Z<sub>s</sub> (L2)** \_\_\_\_\_  $\Omega$     **Z<sub>s</sub> (L3)** \_\_\_\_\_  $\Omega$

**T<sub>a</sub>** \_\_\_\_\_ **ms (residual current device tripping time)**
