

STARÉ SPLAVY

**EFNS
SPRING SCHOOL
FOR YOUNG NEUROLOGISTS**

STARÉ SPLAVY, MAY 9 – 12, 2013

© CzechTourism.com

Scientific programme

Thursday, May 9th Headache

Morning

Stefan Evers, Münster, Germany

Classification and diagnosis of headache disorders

Jes Olesen, Copenhagen, Denmark

Genetics and pathophysiology of headache disorders

John Anker Zwart, Oslo, Norway

Medication overuse headache, epidemiology, diagnosis, mechanisms and management

Heinz Reichmann, Dresden, Germany

Non-motor symptoms in Parkinson's Disease

Afternoon

Stefan Evers: Tension-type headache and other primary headaches, clinical features and management

Jes Olesen: Migraine, clinical features and management

John Anker Zwart: Secondary headaches and trigeminal neuralgia, clinical features and management

Friday, May 10th Dementia

Morning

Constantin Bouras, Geneva, Switzerland

Macro- and microscopic changes in demented brains

Amos Korczyn, Tel Aviv, Israel

Why do we fail in treatment of Alzheimer's dementia

Claudio Bassetti, Bern, Switzerland

Non motor manifestations of Parkinson's Disease

Afternoon

Constantin Bouras: Vascular neuropathology in aging: exploring 10 000 autopsy cases

Amos Korczyn: Vascular cognitive impairment

Claudio Bassetti: Your Diagnosis? (Videosession)

Saturday, May 11th Gait Disorders

Morning

Pavel Kalvach, Prague, Czech Republic

Vascular dementia: haemodynamics and leukoaraiosis

Denis Kaech, Chur, Switzerland

Neurosurgical treatment of frequent causes of gait disorders: hydrocephalus, cervical myelopathy and others
„Gait disorders“

Józef Opara, Katowice, Poland

Rehabilitation of gait after cerebral or spinal, vascular or traumatic injury

Afternoon

Pavel Kalvach: Methodological aspects of CBF measurements in senium

Denis Kaech: “Neurosurgical” lesions causing myelopathy

Józef Opara: Treadmill Training with Partial Body Weight Support –TT-PBWS – new approach to gait training

Sunday, May 12th

Neurology in the world - present state and perspectives

Alena Šteflová, WHO, Prague

WHO priorities in brain and nerve diseases

Pavel Kalvach, Prague

Neurology in the world – present state and perspectives

Martin Pospíšil, Lundbeck, Prague

Educational systems in neurosciences

Orsolya Györfi, EAYNT

Activities of the European Association of Young Neurologists and Trainees

List of Participants

| | | | |
|----|--------------------------------|-----------|-------------------|
| 1 | Gabrielyan Inessa, MD | Armenia | Yerevan |
| 2 | Muradyan Dianna, MD | Armenia | Yerevan |
| 3 | Audzei Sviatlana, MD | Belarus | Grodno |
| 4 | Han Maryna, MD | Belarus | Minsk |
| 5 | Harbachova Nadzeya, MD | Belarus | Minsk |
| 6 | Merkul Volha, MD | Belarus | Minsk |
| 7 | Piarkova Viktoryia, MD | Belarus | Minsk |
| 8 | Sharov Dmitry, MD | Belarus | Minsk |
| 9 | Suhak Yuliya, MD | Belarus | Minsk |
| 10 | Glibert Nele, MD | Belgium | Brussels |
| 11 | Honoré Pieter-Jan, MD | Belgium | Ghent |
| 12 | Đozić Edina, MD | BiH | Sarajevo |
| 13 | Ilieva Paulina, MD | Bulgaria | Sofia |
| 14 | Konstantinova Vesela, MD | Bulgaria | Sofia |
| 15 | Malinska Vanya, MD | Bulgaria | Sofia |
| 16 | Pashova Dimitrina, MD | Bulgaria | Plovdiv |

EFNS Spring School for Young Neurologists, 14th Course

Staré Splavy, Hotel Bezděz, Czech Republic

May, 9-12, 2013

Final Report

Our 14th course came into a month, dedicated by the European Union to raise awareness of the importance of brain-related health care and research. Thus we were happy, that the European Commission has listed also our Spring School among the official events of the "European Month of the Brain". In fact also our topics were much in concert with some especially supported themes of the European initiatives. The joint action for "Alzheimer Cooperative Valuation in Europe," set up in 2010, delivered already concrete recommendations on issues such as the early diagnosis of dementia. One of our days, dedicated to Dementia, presented this topic namely from the histo-pathological point of view (Constantin Bouras), from the complicated view of differential diagnosis (Amos Korczyn) and in an approach of vascular cognitive deterioration (Pavel Kalvach).

Neuropsychological and behavioral deficits accompanying neurodegeneration in Parkinson's disease were also profoundly described in lectures by Prof. Heinz Reichmann and Prof. Claudio Bassetti. These two speakers enriched our faculty concurrently as honorary guests from the European Neurological Society. Being its president and president elect they came to experience the principles of our Spring School, important for their negotiations on the up-coming fusion of our two big European societies.

The topic of Headache, delivered on day one was represented by three speakers, lead by Prof. Jes Olesen. He, so meritorious in the bloom of the EFNS as its past president, he, also founder of the European Brain Council, has been awarded at the opening ceremony by a Medal of the Third Medical Faculty, Charles University in Prague. He lectured on „Genetics and pathophysiology of headache disorders“ and in the afternoon on „Migraine“. Jon Anker Zwart from Oslo and Steffan Evers from Münster clarified the topics of „Medication overuse headache“ and „Classification and Tension type headache“ respectively.

One day was devoted to Gait disorders. These were demonstrated in different diagnoses indicated to surgery. Denis Kaech from Chur presented surgical effectivity in operating on hydrocephalus, spinal cord compressions and various tumors and malformations. Josef Opara from Katowice has reviewed possibilities of rehabilitation in improving gait disorders. In total, speakers came from Denmark, Germany, Israel, Norway, Poland, Switzerland and the Czech Republic.

This year, the course was attended by 118 neurologists from 31 countries: Armenia, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Finland, Georgia, Croatia, Italy, Cyprus, Latvia, Lithuania, Moldova, Germany, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Serbia, Spain, Sweden, Turkey, Ukraine and Uzbekistan. In cooperation with African companies neurologists also came from Egypt, Morocco and Tunisia.

We were happy to welcome our EFNS Head Office team, led by its Executive Director, Mrs. Elisabeth Müller and including Anja Sander and Julia Scheidl, plus Mrs. Eveline Sipido, manager of our branch office in Florence.

Distinguished guests of our course on the last day were Dr. Alena Šteflová, director of the WHO office in Prague, lecturing on "WHO Priorities in brain and nerve diseases" and Ing. Martin Pospíšil, Lundbeck, who familiarized the students with a time-proven educational system used in a Neuroscience Foundation. Dr. Orsolya Györfi, representing the European Association of Young Neurologists and Trainees, informed our participants about available grants and programmes for continuing education. Prof. Kalvach remembered in his review "Prominent neurologists and neurological eponyms."

In the cultural program the participants visited the castle of Mnichovo Hradiště. After a guided tour the dinner was accompanied by a jazz concert of the Swiss group Rollin' Fifties, directed by Denis Kaech. Very joyful evening on the wings of music and dancing! The afternoon of the last day was devoted to a trip to Prague.

Both from the educational point of view as well as in regard to organization the Spring School has been evaluated by the majority of attendees as excellent. We were also proud, that our speakers expressed their admiration to an active audience in the workshops, often astonished at witty questions and commentaries of our eager participants. Just in the sense of the introductory motto, used at the opening of the course: “Venerate doctos, homines, aeternitatis vasa!”

Ing Magda Dohnalová

Prof. Pavel Kalvach, MD
